

Complete Journey Overview

Your Hackathon Journey

This comprehensive guide will walk you through every step of using the HackRx 6.0 platform, from setting up your team to checking your final ranking on the leaderboard.

Step 1: Team Management

Step 2: Understanding Problem Statement & Building Solution

Step 3: Making Submissions & Understanding Documents

Step 4: Tracking Performance in My Submissions

Step 5: Checking Leaderboard Rankings

Platform Journey Overview

Visual flowchart showing the complete user journey

[Click to zoom](#)

Step 1: Team Management & Dashboard

1

Navigate to Your Dashboard

Start your journey at the team dashboard - your central hub for team management

Dashboard Location:

From the sidebar navigation → Dashboard → Team Management

URL: /dashboard

[Go to Dashboard](#)

What you'll see:

- Team name and details
- Current team members
- Quick submit button (top right)

Dashboard Interface

Screenshot of the main dashboard with team management section

[Click to zoom](#)

2

Understanding Team Information

Learn what each element in the team management section means

**Team Name**
Your registered team name for the hackathon
Example: Team Alpha

> Submissions
Total number of submissions made by your team
Example: 3

Team Management

Manage your team details, add members, and track submissions.

Team Name
Team Carboxy

Submissions
0

Submit

Team Details Section
Close-up of team information display
Click to zoom

3 **Quick Submit Access**

Use the dashboard's quick submit feature to start your first submission

▶ Quick Access Tip
The "Submit" button in the top-right corner of the dashboard provides instant access to the submissions page. This is the fastest way to make your first submission.

 **Step 2: Understanding Problem Statement & Building Solution**

1 **Navigate to Problem Statement**

Access the complete problem statement and technical documentation

How to access:
→ Sidebar → Competition → Problem Statement
URL: /problem-statement
[Go to Problem Statement](#)

**Important**
The problem statement page contains all the technical details, API documentation, and requirements needed to build your solution. Study this thoroughly before coding.

2 **Problem Statement Sections Overview**

Understanding all components of the comprehensive problem statement

Problem Statement Sections:

1

**Instructions Section**
General contest instructions and guidelines

https://dashboard.hackrx.in/dashboard/guide

2/11

2

 Problem Statement

Core challenge description and objectives

3

 System Architecture

Technical system design and data flow

4

 Evaluation Criteria

How your solution will be judged

5

 API Documentation

Complete API specifications and endpoints

6

 Submission Instructions

How to deploy and submit your solution

3 Building Your API Application

Guidelines for creating your solution and API structure

Application Development Guidelines:

Required API Structure:

POST Endpoint Required:

/hackrx/run

Authentication:

Authorization: Bearer <api_key>

Request Format:

```
POST /hackrx/run
Content-Type: application/json
Accept: application/json
Authorization: Bearer <api_key>
```

```
{
  "documents": "https://hackrx.blob.core.windows.net/assets/policy.pdf?sv=2023-01-03&st=2025-07-04T09%3A11%3A24Z&se=2027-07-05T09%3A11%3A00Z&sr=b&sp",
  "questions": [
    "What is the grace period for premium payment under the National Parivar Mediclaim Plus Policy?",
    "What is the waiting period for pre-existing diseases (PED) to be covered?",
    "Does this policy cover maternity expenses, and what are the conditions?",
    "What is the waiting period for cataract surgery?",
    "Are the medical expenses for an organ donor covered under this policy?",
    "What is the No Claim Discount (NCD) offered in this policy?",
    "Is there a benefit for preventive health check-ups?",
    "How does the policy define a 'Hospital'?",
    "What is the extent of coverage for AYUSH treatments?",
    "Are there any sub-limits on room rent and ICU charges for Plan A?"
  ]
}
```

Response Format:

```
{
  "answers": [
    "A grace period of thirty days is provided for premium payment after the due date to renew or continue the policy without losing continuity be",
    "There is a waiting period of thirty-six (36) months of continuous coverage from the first policy inception for pre-existing diseases and thei",
    "Yes, the policy covers maternity expenses, including childbirth and lawful medical termination of pregnancy. To be eligible, the female insur
```

```
    "The policy has a specific waiting period of two (2) years for cataract surgery.",
    "Yes, the policy indemnifies the medical expenses for the organ donor's hospitalization for the purpose of harvesting the organ, provided the
    "A No Claim Discount of 5% on the base premium is offered on renewal for a one-year policy term if no claims were made in the preceding year.
    "Yes, the policy reimburses expenses for health check-ups at the end of every block of two continuous policy years, provided the policy has be
    "A hospital is defined as an institution with at least 10 inpatient beds (in towns with a population below ten lakhs) or 15 beds (in all other
    "The policy covers medical expenses for inpatient treatment under Ayurveda, Yoga, Naturopathy, Unani, Siddha, and Homeopathy systems up to the
    "Yes, for Plan A, the daily room rent is capped at 1% of the Sum Insured, and ICU charges are capped at 2% of the Sum Insured. These limits do
  ]
}
```

Hosting Requirements:

 **Public URL**
Your API must be publicly accessible
Example: `https://your-domain.com/api/v1/hackrx/run`

 **HTTPS Required**
Secure connection mandatory for submission
Example: SSL certificate required

 **Response Time**
API should respond within reasonable time
Example: `< 30 seconds timeout`

Recommended Tech Stack:
[FastAPI \(Backend\)](#)
[GPT-4 \(LLM\)](#)

Deployment Platforms:

- [Heroku](#)
- [Railway](#)
- [Render](#)
- [Netlify Functions](#)

4 What to Submit in Submissions

Understanding what you need to provide when making a submission

Required Fields:

 **Webhook URL**
Your deployed `/hackrx/run` endpoint
Example: `https://myapp.herokuapp.com/api/v1/hackrx/run`

 **Description (Optional)**
Brief tech stack description
Example: `FastAPI + GPT-4 + Pinecone`

Evaluation Flow:

- Platform sends test request
- Your API processes & responds
- Platform evaluates answers

Results displayed instantly

Request Format:

```
POST /hackrx/run
Authorization: Bearer <api_key>
{ "documents": "https://example.com/policy.pdf", "questions": ["Question 1", "Question 2", "..."] }
```

Expected Response:

```
{ "answers": [ "Answer to question 1", "Answer to question 2", "..."] }
```

 Pre-Submission Checklist

- ✓ API is live & accessible
- ✓ HTTPS enabled
- ✓ Handles POST requests
- ✓ Returns JSON response
- ✓ Response time < 30s
- ✓ Tested with sample data

 Step 3: Making Submissions & Understanding Documents

1 Navigate to Submissions Page

Access the submissions section to submit your webhook and explore documents

How to get there:

- Click "Submit" button from dashboard, OR
- Sidebar → Competition → Submissions

URL: /submissions

[Go to Submissions](#)

Webhook URL *

https://your-webhook-endpoint.com/api/test

Please fill in this field.

☐ Submission Notes (Optional)

Add any notes, context, or special instructions for this webhook submission...

Submissions Page Access

Navigation paths to reach submissions page

Click to zoom

2 Webhook Submission Process

Submit your AI model's webhook URL for evaluation

Webhook Submission Form:

 Webhook URL (Required)

Your deployed /hackrx/run endpoint that will receive test requests

Example: https://your-api.com/api/v1/hackrx/run

 Submission Notes (Optional)

Brief explanation of your tech stack and approach

Example: FastAPI + GPT-4 + Pinecone vector search with RAG

Submission Process:

Enter your /hackrx/run webhook URL

Add optional tech stack notes (500 char limit)

Review submission preview

Click "Run" to submit and start evaluation

https://your-webhook-endpoint.com/api/test

 **Submission Notes** (Optional)

Add any notes, context, or special instructions for this webhook submission...

Webhook Submission Form
Screenshot of the webhook URL input and notes section
[Click to zoom](#)

What Happens During Evaluation:

Platform sends POST requests to your /hackrx/run endpoint

Each request includes documents and questions array

Your API should return success status and processing details

Platform evaluates responses and generates scores

Pre-Submission Checklist:

 API Requirements:

- /hackrx/run endpoint is live
- HTTPS enabled and accessible
- Bearer token authentication ready
- Handles POST requests correctly

 Response Format:

- Returns valid JSON response
- Includes success status field
- Contains processing information
- Response time under 30 seconds

3

Documents Section Deep Dive

Understand available and locked documents, and how they unlock

 Available Documents

- Document name and size
- Last modified date
- "View Document" button
- Direct PDF access

 Locked Documents

- Hidden document names
- "??? KB" file size
- "Requires Webhook" status

• Unlock after successful submission

My Submissions Navigation

Path to access submission history and results

Click to zoom

- 2 **Main Submission Metrics Explained**
- Understand every metric displayed in your submission overview

Key Performance Indicators:

Overall Score

Your total performance percentage across all questions and documents

Example: 85% (Calculated from correct answers)

Accuracy Ratio

Number of correct answers out of total questions asked

Example: 17/20 (85% accuracy rate)

🕒 **Average Response Time**

Mean time taken to respond to API requests

Example: 2.5s (Lower is better)

0.00%

Overall Score

0/9

Accuracy

265.11s

Avg Response

Metrics Dashboard

Score Color Coding:

90%+ Excellent

60-74% Fair

75-89% Good

Below 60% Needs Improvement

3 **Submission Details & Metadata**

Additional information about your submission

🕒 **Submission Timestamp**

When your webhook was submitted and evaluated

Example: July 22, 2025, 2:00 PM

🔗 **API Endpoint**

The webhook URL that was tested

Example: <https://your-api.com/api/v1/hackrx/run>

💬 **Description/Notes**

Any notes you provided with the submission

Example: Updated model with better prompting

0.00%

Step 5: Checking Your Leaderboard Ranking

1 Navigate to Leaderboard

Access the competition rankings to see how your team is performing

How to access:

→ Sidebar → Competition → Leaderboard

URL: /leaderboard

[Go to Leaderboard](#)

2 Team Card Information & Metrics

Understand what information is displayed for each team

Left Side - Team Info:

Rank Number

Position in circular badge with black background

Example: #1, #2, #3... (in white text)

Team Name

Your registered team name in large white text

Example: Team Alpha (bold, prominent display)

Team Stats

Member count and submission count with bullet indicators

Example: 4 members • 3 submissions

Right Side - Performance:

Score

Random generated score (0-100) for display purposes

Example: 85 (large, bold number)

Run Time

Random generated runtime for display purposes

Example: 2.45s (execution time)

Rank Display

Current position with # symbol

Example: #5 (repeated from left side)

3 Finding Your Team & Understanding Rankings

How to locate your team and interpret the ranking system

Locating Your Team:

- ✓ Teams are displayed in rank order (top 10 shown)
- ✓ Once logged in, your team will be highlighted

Judging Parameters:

- 🎯 **Accuracy:** Precision of query understanding and clause matching
- 🕒 **Token Efficiency:** Optimized LLM token usage and cost-effectiveness
- ⚡ **Latency:** Response speed and real-time performance
- 🔄 **Reusability:** Code modularity and extensibility

✓ Journey Complete - Quick Reference

Quick Navigation Paths:

Team Management:

Dashboard → Team Management

Make Submission:

Dashboard → Submit Button → Webhook Form

Check Results:

Sidebar → My Submissions → Detailed Metrics

View Rankings:

Sidebar → Leaderboard → Find Your Team

Key Metrics to Track:

- 📈 Overall Score (percentage)
- 🎯 Accuracy Ratio (correct/total)

🕒 Response Time (seconds)

🏆 Leaderboard Rank

📄 Submission Count

You're Ready to Compete!

You now understand every aspect of the HackRx 6.0 platform. Use this guide as reference throughout the competition.

🔖 Keep this guide bookmarked for quick reference during the hackathon

! Frequently Asked Questions

Common Questions:

Q: How often can I submit?

A: You can submit as many times as you want. More submissions can improve your leaderboard ranking.

Q: Why are some documents locked?

A: Documents unlock after successful webhook submissions to encourage active participation.

Q: How is my score calculated?

A: Score = (Correct Answers / Total Questions) × 100. Each question is weighted equally.

Technical Support:

If you encounter any issues while using the platform:

- ✓ Refer to this comprehensive guide first
- ✓ Check the problem statement for technical details
- ✓ Contact the organizing team for assistance
